Projects

Post To Sold || Back End Developer || Deployed Link: https://pr0jectnum2.herokuapp.com/
Github Link: https://github.com/kimnana45/Project2

Post To Sold is a website that let users create their own account. Users are then able to post items they would like to sell, purchase items from other users, and view all the items that are available.

Role: research and implement Filestack API in the app to work with upload image function. Help created Sequelize database. Assist in writing the routes for posting items and purchase items.

Utilize: Sequelize, NodeJs, Express, Handlebars, Javascript, Heroku, Bootstrap, HTML and CSS

The Classic Genius || Back End Developer || Deployed Link: https://demetrio09.github.io/Project-1/ **Github Link:** https://github.com/Demetrio09/Project-1

The Classic Genius is an app designed to let user collect scholar research articles from many resources, while playing classical music to enhance the user's study environment. If the user likes what they hear, they can click on the song title, which will take them to last.fm library that will provide additional information on the song and artist.

Role: created functions to play music. Research and implement the last.fm API key. Assist in designing the layout of the page.

Utilize: HTML, CSS, JSON, Materialize, AJAX, HTTP GET requests, and Server-side APIs

Burger || Front End Developer || Deployed Link: https://vast-ridge-83982.herokuapp.com/ **|| Github Link:** https://github.com/kimnana45/burger

Burger is a restaurant app that lets users input the names of burgers they'd like to eat.

Role: Created HTML page styled with CSS to be able to add burgers to devour. Made a MySQL database to store and change data and set up the Express server to request the use of the built-in Express file from Node modules.

Utilized: MySQL, NodeJs, Express, Handlebars, Javascript, Heroku, Bootstrap, HTML and CSS
